SUMMARY

Full Stack Web Developer with Bachelor's degree and computer science certificate, with extensive experience in sales. Artistic capabilities help to create polished, user-friendly applications with exquisite functionality. Passion for design and developing applications; would love to one day develop apps for both Android and Apple. Famous for quick mastery of skills, a sense of humor, and a strong leadership personality.

PROJECTS

EventSafe

<https://github.com/wilsoncollin7/EventSafe> | <https://project-2-team-3.herokuapp.com/>

- Application that allows users to post and review events/businesses and how they are handling current COVID-19 precautions
- The site is hosted on Heroku and uses SQL to record the entries and saves them to a database
- This site uses MVC practices and has built in security checks and authenticators.
- Used HTML, CSS, Bootstrap, JavaScript, Node.js, Sequelize, Express.js, MySQL, Handlebars, Google Map API

Earthlight

<https://github.com/wilsoncollin7/Earthlight> | <https://wilsoncollin7.github.io/Earthlight/>

- Created a weather application that uses the Open Weather Map API and the Google maps API with a weather overlay
- The application takes in a city as its input and dynamically changes the page to display a weather forecast and a map that shows clouds and precipitation
- Used HTML, CSS, Bootstrap, jQuery, JavaScript, and Moment

Eat-Da-Burger

<https://github.com/wilsoncollin7/eat-da-burger>
<https://burger-express-collin.herokuapp.com/>

- This is a restaurant app that lets the user input burgers they would like to eat!
- Full Stack program which uses an Express server and a SQL database, site is hosted on Heroku
- Used HTML, CSS, Express.js, Handlebars, MySQL, Heroku, JAWSDB, MVC, ORM
